Hiring Manager

Blue Cross of Idaho

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Healthcare Economics Analyst Intern position at Blue Cross of Idaho. As a student pursuing a degree in a quantitative field with a strong focus on data science and financial analysis, I am eager to apply my technical skills to help drive data-driven recommendations within the health insurance industry.

The opportunity to join the Healthcare Economics team aligns perfectly with my background in extracting insights from complex datasets. My academic and project experience has allowed me to develop a technical toolkit that closely aligns to your requirements:

- **Programming & Data Manipulation:** I am proficient in Python and SQL, with experience using libraries like Pandas and Scikit-learn to clean, manipulate, and analyze large datasets. I have also utilized R for statistical applications, ensuring I can adapt to the team's preferred workflows.
- **Communication of Complex Data:** Beyond the technical execution, I pride myself in my ability to translate "highly technical information" into clear insights. Whether designing residual plots or explaining model accuracy, I am comfortable presenting findings to ensure they are accessible to diverse stakeholders.
- **Analytical Mindset:** My work in credit essentials and financial analysis has sharpened my ability to examine data patterns and trends to answer critical business questions, a skill I am excited to bring to your company.

Thank you for your time and consideration. I look forward to the possibility of discussing how my analytical background can support the Healthcare Economics team.

Sincerely,

Hannah Mills
